[Candidate Name]

Dallas, TX | 000-000-0000 | candidate_email@example.com | LinkedIn: linkedin.com/in/candidatename

PROFESSIONAL SUMMARY

Detail-oriented IT professional with 2+ years of hands-on experience in technical support, endpoint troubleshooting, and access management, now transitioning into cybersecurity. Familiar with core security concepts including log analysis, network fundamentals, and the incident response lifecycle. Actively pursuing CompTIA Security+ to complement A+ certification and formalize knowledge of SIEM operations, threat detection, and vulnerability management. Eager to contribute to a SOC team by applying a strong foundation in IT operations and a growing proficiency in cybersecurity tools and best practices.

TECHNICAL SKILLS

SIEM & Log Analysis: Splunk (foundational), Microsoft Sentinel (studying), Windows Event Logs, Syslog
Networking & Security: TCP/IP, DNS, DHCP, Firewalls, VPNs, OSI Model, Network Traffic Analysis
Incident Response: Alert triage, ticket escalation, basic IOC identification, NIST IR Framework (studying)
Operating Systems: Windows 10/11, Windows Server (basic), Linux CLI (basic)
Cloud Fundamentals: AWS Cloud Practitioner concepts (IAM, CloudTrail, S3 basics)
Security Frameworks: NIST CSF, CIA Triad, MITRE ATT&CK (foundational)
Tools & Platforms: Active Directory, ServiceNow/Help Desk Ticketing, Microsoft 365, Remote Desktop
Certifications (In Progress): CompTIA Security+, CompTIA A+

PROFESSIONAL EXPERIENCE

IT Support Specialist | Mid-Sized Company | *2022 – Present*

- Monitored and triaged help desk tickets related to unauthorized access attempts and account lockouts, applying basic principles of identity and access management (IAM) to resolve and escalate issues appropriately.
- Performed log reviews in Windows Event Viewer to investigate failed login attempts, suspicious account activity, and system errors, documenting findings and escalating anomalies to senior staff.
- Supported incident response workflows by collecting and preserving relevant system information during security-related tickets, ensuring proper chain of custody for IT incident documentation.
- Configured and maintained endpoint security settings across 100+ workstations, including patch management and antivirus updates, reducing vulnerability exposure across the environment.
- Collaborated with network team to troubleshoot connectivity issues, gaining practical experience with firewall rules, VPN access controls, and TCP/IP network fundamentals.
- Managed user account lifecycle in Active Directory, including provisioning, de-provisioning, and permission audits — directly aligned with least-privilege security principles.
- Responded to phishing report tickets by collecting email headers and URLs for analysis, developing foundational skills in threat identification and social engineering awareness.

EDUCATION

Bachelor of Science in Information Technology

University Name | Graduation Year

CERTIFICATIONS & TRAINING

- CompTIA A+ — In Progress (Expected: [Month Year])
- CompTIA Security+ — In Progress (Expected: [Month Year]) | Actively studying: SY0-701
- AWS Cloud Practitioner — Self-Study (Foundational cloud security concepts: IAM, CloudTrail, GuardDuty)
- TryHackMe / Blue Team Labs — SOC-focused hands-on labs (SIEM analysis, log investigation, incident response simulations)

RELEVANT PROJECTS & SELF-STUDY

- Home Lab — SIEM Setup: Deployed Splunk Free in a home lab environment; ingested Windows and Linux system logs, created dashboards to detect failed authentication and privilege escalation patterns.
- Incident Response Simulation: Completed TryHackMe SOC Level 1 learning path, covering log analysis, SIEM alerting, phishing investigation, and network traffic analysis using Wireshark.
- Vulnerability Research: Practiced with NIST NVD and CVE databases to identify and assess common vulnerabilities; documented findings with remediation recommendations.
